Carnforth Urban District Council

Annual Report of the Medical Officer of Health

For the Year 1966

To the Chairman and Members of the
Carnforth Urban District Council.

Mr. Chairman, Madam and Gentlemen,

According to the Registrar General's estimate the population of the Urban District at mid 1966 was 4,160 an increase of 20 from the previous year.

There were 59 live births registered, equivalent to an adjusted birth rate of 14.6 per 1,000 population, the comparable rate for England and Wales being 17.7 per 1,000.

Deaths from all causes totalled 52, 11 more than in 1965. This represented an adjusted death rate of 14.2 per 1,000 population, which may be compared with the national rate of 11.7 per 1,000. The commonest single cause of death continues to be coronary heart disease.

It is pleasing to be able to report that there have been no deaths of mothers due to or associated with childbirth since 1954 and that no deaths of infants under one year of age have occurred in the last three years.

The incidence of infectious diseases during the year was low and the general health of the inhabitants of the town remained satisfactory.

In the last section of the report your Public Health Inspector has reported fully on the sanitary circumstances of the area.

The routine inspection and supervision of water supplies, sewerage and sewage disposal systems, refuse collection, housing, food hygiene, etc., are still vitally important to the maintenance of a healthy environment.

From inspections carried out during the year it was evident that a considerable improvement is still necessary in certain food premises in order to comply with the standards laid down under the Food Hygiene Regulations, 1960.

There appears from a study of the waiting list for housing for old people that there is a serious need for the provision of special accommodation suitable for the needs of old people.

The long awaited arrangements for the combined sewage disposal scheme to serve Carnforth and parts of Lancaster Rural District have now been approved by the Ministry and it is hoped that work on this scheme will be commenced at an early date.

In conclusion I wish to express to members of the Council the thanks of the Department for their continued interest and support in this work and to members of the staff my appreciation of their ready help and co-operation at all times.

Yours faithfully,

R. W. FARQUHAR,

Medical Officer of Health.

SECTION A.

STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

GENERAL STATISTICS OF THE AREA.

AREA of the District (Acres)	1,504
POPULATION (Census 1931)	3,139
„ (Census 1951)	3,388
„ (Census 1961)	4,113
„ (Registrar General's Estimate Mid/1966)	4,160
NUMBER OF INHABITED HOUSES (1951)	1,095
NUMBER OF INHABITED HOUSES (1966)	1,380
RATEABLE VALUE	£111,885
SUM REPRESENTED BY A PENNY RATE	£436

—:0:—

SOCIAL CONDITIONS INCLUDING CHIEF OCCUPATIONS OF INHABITANTS

The social conditions of the District are very satisfactory. The chief occupations of the inhabitants are Railway and Agricultural Work.

SUMMARY OF VITAL STATISTICS—1966

		Males	Females	Total
LIVE BIRTHS (Legitimate)	30	27	57	
(Illegitimate)	1	1	2	
TOTAL	31	28	59

Adjusted death rate (comparability factor 1.15)=14.2

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

GENERAL PROVISION OF HEALTH SERVICES IN THE AREA

In sections C and D of the report full details will be found relating to infectious diseases and environmental health within the Carnforth Urban District, for which services the Council are directly responsible.

The present section is related to those health services which concern mainly the personal health and welfare of the individual rather than public health and the community. Divisional Health Committee No. 2 of the Lancashire County Council, on which committee your Council has one representative, is responsible for the day-to-day administration of the following services, available to the inhabitants of Carnforth as well as to those of neighbouring districts.

(1) Domiciliary Services.

For the benefit of residents in the area two district nurse/midwives are resident in Carnforth, others being available nearby at Silverdale and Bolton-le-Sands. Six health visitors, who are also trained nurses, are centred on the School Clinic in Market Street. Several Home Helps are resident in Carnforth and Warton.

(2) Care of Mothers and Young Children.

This service is closely correlated with the domiciliary midwifery, health visiting and domestic help services, by which means the mother can receive advice and care for herself and her child as well as help in the home during and after her confinement.

During 1966 the average attendance at the Carnforth child welfare centre was 56.9 children per weekly session.

(3) Combined School Clinic and Child Welfare Centre.

At 21 Market Street, Carnforth, in addition to the child welfare session on Tuesday afternoons (2—4 p.m.) a minor ailment clinic for school children is held on Friday mornings (9.30—11.30 a.m.). An eye clinic is held on alternate Wednesday mornings, and a dental clinic on each Tuesday and Thursday all day. A clinic is held every Thursday afternoon at which expectant mothers attend for relaxation, exercises and the teaching of mothercraft.

(4) Immunisation and Vaccination.

Immunisation against diphtheria, whooping cough, tetanus, and vaccination against smallpox are free services, available either from the family doctor or through the school clinic. Since 1956 vaccination against poliomyelitis and tuberculosis has also been available to children in certain age groups.

(5) Ambulance Service.

The Carnforth area is served by ambulances based on the Lancaster and Morecambe stations.

(6) Other Services.

Certain other services are organised on a divisional basis, without allocation of staff to particular areas. Thus 5 mental health workers and one tuberculosis health visitor cover the whole division. The arrangements for sending persons recovering from illness to convalescent homes are made through the Divisional Health Office, Lancaster.

(7) Welfare Services—National Assistance Act, 1948.

The following welfare services are also administered by the Divisional Health Committee :—

- (a) Residential Accommodation : For persons in need of care and attention not otherwise available to them accommodation is provided at Dolphinlee, The Laurels, Fair Elms and Beaumont View at Lancaster ; at the Empress Hostel, Morecambe ; Moor Platt and The Hermitage at Caton ; Slyne House at Slyne-with-Hest.
- (b) Temporary Accommodation : In case of urgent need, e.g. fire, flood or eviction, temporary shelter is provided by arrangement with the County Medical Officer of Health.
- (c) Handicapped Persons : For persons who are blind, deaf, or otherwise substantially and permanently handicapped, certain welfare services and facilities are made available, either through the agency of voluntary organisations or directly by the County Council.

(d) Homes for Disabled and/or Old Persons : There are seven homes of this nature in the division, all managed by voluntary/or private bodies. These are registered and inspected regularly by the divisional medical staff.

(8) Laboratory Facilities.

The bacteriological examination of milk, water and specimens in connection with infectious diseases is carried out by Dr. Robertson and his staff at the Public Health Laboratory, Preston. Samples of water for chemical examination are sent to the Public Analyst at Preston. Analysis of food and drugs is carried out under the direction of the Lancashire County Council.

(9) Treatment Centres and Clinics.

The following clinics are administered by the North Lancashire and South Westmorland Hospital Management Committee:—

- (a) Tuberculosis :—Chest Clinic, Beaumont Hospital, Lancaster.
- (b) Venereal Diseases :—Special Treatment Centre, Royal Lancaster Infirmary.
- (c) Deaf Aid Clinic :—A session for the provision of batteries and cords for hearing aids is held at 21, Market Street, Carnforth, on the first Friday of each month.

**PREVALENCE OF, AND CONTROL OVER
INFECTIOUS DISEASES.**

TUBERCULOSIS

During 1966 one case of respiratory tuberculosis was notified but no deaths from this disease were recorded.

IMMUNISATION AND VACCINATION

Since 1948 only one case of diphtheria has been notified in Carnforth. The young mothers of to-day do not realise the danger of this disease but localised outbreaks still occur sporadically in this country. The present immunisation and vaccination programme now affords a considerable degree of protection against six diseases—diphtheria, whooping cough, tetanus, poliomyelitis, tuberculosis and smallpox, and it is important that every advantage be taken of this service so as to ensure a high level of immunity in the population.

In the following table the numbers of Carnforth children immunised against diphtheria, whooping cough and tetanus in the last ten years are compared.

IMMUNISATION IN CARNFORTH — 1957-1966

Number of individuals, aged 0-15 years, who completed a full course of primary immunisation

In Year	Diphtheria	Whooping Cough	Tetanus
1957	79	72	71
1958	80	76	67
1959	81	79	75
1960	103	94	99
1961	63	58	63
1962	61	60	61
1963	65	56	66
1964	85	78	93
1965	54	47	58
1966	67	60	69

Number of individuals, aged 0-15 years, who were given a re-inforcement injection

In Year	Diphtheria	Whooping Cough	Tetanus
1957	70	12	2
1958	135	36	3
1959	141	19	5
1960	138	12	36
1961	138	18	78
1962	155	15	101
1963	182	18	102
1964	90	14	67
1965	140	13	97
1966	138	9	125

**SANITARY CIRCUMSTANCES
OF THE AREA.**

WATER SUPPLY.

Water, abundant in quantity, is supplied from the Lune Valley Water Board reservoir situated at Withneths, which has a capacity of 52 million gallons. It is chlorinated and filtered. Eight samples were submitted by the Local Authority for bacteriological analysis, and 5 were reported to be highly satisfactory, 3 unsatisfactory.

In addition reports of 22 samples taken by the Board, indicate 14 as satisfactory and 8 as unsatisfactory. The variation of quality of samples taken is a matter which I have already raised with the Water Board, and it would appear that there is need for some further action, so as to ensure a continuity of bacteriologically sound supplies.

A Water tank was provided during the year at the Filter House, Kellet Road, Carnforth, holding a quantity sufficient for the purpose of back washing the Filters. This alleviated the supply taken from the public mains and has resulted in a greatly improved and adequate pressure to the higher points of the district which was previously devoid of an adequate water pressure.

With the exception of 5 private houses and 2 farm houses, all permanent dwellings within the area are connected to the public water supply. In the case of 3 of the 5 private houses and one farm early mains connections are expected and the two remaining have a pure and wholesome supply of well water.

SEWERAGE AND SEWAGE DISPOSAL.

The sewerage of the whole area is by gravity. In general it is the "combined" system, though a "separate" system has been introduced to deal with a site of approximately 140 houses, whereby rainwater from roofs and roads is discharged to an open watercourse in order to avoid any additional loading of the Highfield and Kellet Road sewers.

The main portion of the town, which includes the area which has been used for post-war housing expansion, is seweraged to a tank alongside the River Keer (a tidal stream) and after settling in this tank the effluent is subject to discharge. Two other sewage disposal plants deal with the remaining portion of the district (the Crag Bank area), each discharging the effluent into adjacent streams after sedimentation and filtration. The tidal tank referred to above undertakes no purification whatever, and is unsuitable as a disposal unit.

The Joint Sewerage and Sewage Disposal Scheme with Lancaster Rural District Council has now been approved by the Ministry and it is hoped to appoint a contractor for this work in the near future.

PROVISION OF WATER CLOSETS, ETC.

With the exception of six premises, all dwellings (inclusive of farms) within the area have fresh water closets.

REFUSE COLLECTION.

The Council continue to tip at Cote Stones by agreement with the Lancaster Rural District Council and arrangements are very satisfactory to the Council.

A weekly collection of domestic refuse is made and trade refuse is collected from various premises. Approximately 1,680 bins per week are dealt with.

HOUSING.

During 1966 19 houses have been built by private enterprise. Housing development in the area is very much confined at present owing to the embargo placed on future development by the Council approximately 3 years ago, because of the inability to cope with increased sewerage in our existing sewerage disposal plants.

It is expected, however, that subject to the construction of new sewerage disposal works as proposed, a further 100 acres of land within the Urban district would be released for development.

The existing housing facilities are made up as follows :—

- 676 modern type.
- 458 cottage type
- 286 parlour type.

Further progress in house improvements has been made by "Standard" grants approved by the Local Authority, 9 having been granted during the year. In addition 4 "Discretionary" Grants have been made.

SANITARY INSPECTIONS.

No. of premises inspected	150
Defects discovered	44
Defects remedied	38
Informal Notices served	23
Statutory Notices served	None

COMMON LODGING HOUSES

There are none in the area.

INSPECTION OF MEAT AND OTHER FOODS AND FOOD PREMISES.

The three butchers in the area are obtaining carcase meat and offal from wholesale distributors outside Carnforth. It is inspected before despatch and as there are no local slaughter-houses within the area the problem of meat inspection at time of slaughter of animals does not arise.

Small amounts of tinned foods, surrendered by shopkeepers, i.e., 2 cwt. 62 lbs. in total were condemned as unfit for human consumption and certificates given accordingly.

MILK SUPPLY.

Action taken with regard to the administration of the Milk and Dairies Acts and Regulations.

The Milk and Dairies Regulations 1949—

No. of distributors registered by the L.A. and operating from :—

(a) Dairies in the district	4
(b) Shops in the district other than dairies	4
(c) Premises outside the district	3

Action taken by the L.A. in relation to samples taken within the district.

RESULTS	No. of Samples Submitted	1966			RESULTS
		Positive	Negative	No result	
20					
(1) Tuberculosis		Nil	Nil	Nil	
(2) Brucellosis—Ring Test		Nil	20	Nil	
(3) Brucellosis—Culture Test		Nil	Nil	Nil	
(4) Brucellosis—Biological Test		Nil	Nil	Nil	

B. Samples for Statutory Test

RESULTS	No. of Samples	Satisfactory		Unsatisfactory	Void Samples
Raw Milk					
(1) Methylene Blue Test	13	9		4	2
Heat Treated Milk					
(1) Methylene Blue Test	6	6		Nil	Nil
(2) Phosphatase Test	6	6		Nil	Nil
(3) Turbidity Test	1	1		Nil	Nil

Results of Ministry Investigations	Nil
No. of herds examined by veterinary inspectors	Nil
No. of cases where animals seized under Tuberculosis Order, 1938	Nil
No. of animals seized	Nil
No. of cases reported negative where animals had been seized	Nil
No. of cases reported negative, no animals seized	Nil
Action taken under Regulation 19 of the M. and D. Regulations, 1949	None necessary
Action taken under Regulation 20 of the M. and D. Regulations, 1949	None necessary

ICE CREAM.

There are no premises in the district manufacturing ice cream by the heat treatment process and the 17 premises registered for the sale of ice cream are satisfactory for the purpose.

FOOD POISONING.

There have been no outbreaks of food poisoning within the Urban District during the year.

RODENT CONTROL.

The Council's area has been little affected by rats or mice and no notices have been required to enforce disinfestation.

The Sewers have shown themselves free on test baiting. The sewage disposal works are occasionally found infested, but they are treated when necessary and kept under control.

PUBLIC SWIMMING BATHS.

There are none in the area.

FACTORIES AND WORKSHOPS.

There are 22 in number and are of a small type. No conditions have been found calling for action and no reports received of non-compliance with the Act.

	Class of Premises	Wholesale Shops, Warehouses	Catering establishments open to public canteens	Fuel Storage Depots
	Retail Shops	Offices		
(i) No. of registered premises at end of year	11	31	1	5
(ii) No. of registered premises re- ceiving a general inspection during year	—	—	8	—
No. of visits of all kinds by inspectors to registered premises ...	18			
Details of any prosecutions during year	None			

CARAVANS

There are five licensed sites within the urban district, 1 of which is suitable for holiday accommodation only and 4 which are used for permanent residential accommodation.

The sites are generally satisfactory and no nuisances occurred during the year.
